## **Officials about Forum&Exhibition events 2014**

**Ivan D. Grachev, Chairman of the State Duma Committee for Energy of the Federal Assembly of the Russian Federation**

"It's necessary to support the idea and format of the annual International Exhibition&Forum" Exploration. Production. Processing" as a platform for discussion of representatives of the international organizations, Russian and foreign energy ministries and agencies, the largest industrial and consulting companies, international experts with the purpose of promoting the interests of national energy policy at the international level and the implementation of major initiatives in the field of Russian power."

**Alexander V. Novak, Minister of Energy of the Russian Federation**

"Globalization of the energy sector, objective necessity of exploring and developing new resources, solving environmental problems, introducing innovative technologies in the transition from resource-based to resource-innovative development of the energy sector put as a priority the task of increasing level of competitiveness of the human resources, which is the main resource of the state. Namely that factor will allow the Russian energy sector to take the leading positions in energy technologies, production of intellectual products and to have the best in the world experts to provide innovative development of the sector. Therefore, investments into the social sphere, into human being and his qualification become the most important condition of achievement of the objectives and the main strategic reference points of the Energy Strategy of Russia for the period till 2035".

**German Gref, Chairman of the Public Council under the Ministry of Energy of Russia,  
Chairman of the Board of Sberbank of Russia**

"In modern political and economic conditions the investment into the human resources has become the most important instrument of crisis management. The value of the human capital as the main resource of the state considerably increases and its further development, directed on achievement the competitive level, becomes one of priority tasks in all sectors of economy. The growth of capacity of knowledge of workers promotes practical application of an innovation and, as a result, labor productivity growth. In the Russian Energy strategy for the period till 2035 the special attention is paid to a question of development of the human resources and social policy. I pin my hopes on the strategic document developed with the assistance of Public council of the Ministry of Energy of the Russian Federation will be successfully realized, and during human resources conference with the help of consolidation expert opinions effective ways of realization will be developed."

**Alexander Voloshin, Member of the Public Council at the Russian Ministry of Energy**

"In this regard in Power strategy of Russia for the period till 2035 ambitious tasks, which realization will allow providing the Russian power with the competitive human resources possessing necessary competences for introduction of new breakthrough technologies, innovative development of energy sector are set. Being convinced that the conference devoted to discussion of ways and methods of implementation of the strategic document of Russian power energy sector regarding development of social policy and the human capital in energy sector will attract attention of a wide range of participants of the energy market and will promote the development of new effective, agreed decisions of the state and business sectors".
